NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FIRST QUARTER AND THREE MONTHS ENDED JUNE 30, 2010 AND 2009

1. NATURE OF OPERATIONS AND GOING CONCERN

Burnstone Ventures Inc. (the "Company") is an exploration stage company and is primarily engaged in the acquisition, exploration and development of mineral resource properties located in Canada.

The Company is in the process of exploring its mineral properties and has not yet determined whether these properties contain mineral reserves that are economically recoverable. The continued operations of the Company and the recoverability of the amounts shown for mineral properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development, and upon future profitable production. The amounts shown as resource properties and deferred exploration costs represent costs to date and do not necessarily represent present or future values. Changes in future conditions could require material write-downs of the carrying amounts of the resource properties.

These unaudited interim consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles ("Canadian GAAP"), except that they do not contain all disclosures required for annual financial statements. The unaudited interim consolidated financial statements have been prepared following the same accounting policies as for the audited consolidated financial statements for the year ended March 31, 2010. Accordingly, they should be read in conjunction with the 2010 audited consolidated financial statements and the notes thereto which are available on SEDAR at www.sedar.com.

These unaudited interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will realize its assets and discharge its liabilities in the normal course of operations. At June 30, 2010, the Company had not yet achieved profitable operations, had accumulated losses of \$63,324,813 since its inception, had working capital of \$141,259 which may not be sufficient to sustain operations over the foreseeable future and expects to incur further losses in the development of its business. The Company's ability to continue as a going concern is dependent upon its ability to generate future profitable operations and/or to obtain the necessary financing to conduct its planned work programs on its mineral properties, meet its ongoing levels of corporate overhead and commitments (Note 10), keep its properties in good standing and discharge its liabilities as they come due. Funding for operations is obtained primarily through public and private share offerings.

Management recognizes that the Company will need to continue to raise additional funds to complete the development phase of its programs and, while it has been successful in doing so in the past there can be no assurance that it will be able to continue to do so in the future. If the Company is unable to raise additional equity financing, the Company will be required to curtail operations and exploration activities. Management believes that the Company will be able to continue to raise additional funds and has prepared these unaudited interim consolidated financial statements on a going concern basis. Realization values may be substantially different from the carrying values as presented in the unaudited interim consolidated financial statements should the Company be unable to continue as a going concern. It is management's opinion that all adjustments considered necessary for fair presentation of the results for the periods presented have been reflected in these unaudited interim consolidated financial statements.

2. NEW ACCOUNTING STANDARDS

New accounting standards not yet adopted

*Section 1582 - Business Combinations, Section 1601 - Consolidated Financial Statements,
Section 1602 - Non-controlling Interests*

In January 2009, the CICA issued Handbook Sections 1582 Business Combinations, 1601 Consolidated Financial Statements, and 1602 Non-controlling Interests, which replaces CICA Handbook Sections 1581 Business Combinations and 1600 Consolidated Financial Statements. Section 1582 establishes standards for the accounting for business combinations that is equivalent to the business combination accounting standard under International Financial Reporting Standards. Section 1582 is applicable for the Company's business combinations with acquisition dates on or after January 1, 2011. Early adoption of this Section is permitted. Section 1601 together with Section 1602 establishes standards for the preparation of consolidated financial statements. Section 1601 is applicable for the Company's interim and annual financial statements for its fiscal year beginning April 1, 2011. Early adoption of this Section is permitted. If the Company chooses to early adopt any one of these Sections, the other two sections must also be adopted. The Company does not expect the adoption of these new accounting standards will have an impact on its financial statements.

International Financial Reporting Standards

In February 2008, The CICA Accounting Standards Board ("AcSB") confirmed the changeover to International Financial Reporting Standards ("IFRS") from Canadian GAAP will be required for publicly accountable enterprises effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The Company will adopt IFRS effective April 1, 2011 and will be required to restate, for comparative purposes, amounts reported by the Company for its year ended March 31, 2011. The Company does anticipate a significant increase in disclosure resulting from the adoption of IFRS as well as certain presentation differences. The Company is continuing to assess the impact on the financial statements and is in the process of developing an IFRS changeover and implementation plan.

3. FINANCIAL INSTRUMENTS

Designation and valuation of financial instruments

The Company enters into financial instruments to finance its operations in the normal course of business. The carrying values of the Company's financial instruments compared to their fair values are as follows:

- The fair values of cash and cash equivalents, goods and services tax recoverable, reclamation bond, accounts payable and accrued liabilities and due to related parties approximate their carrying values due to the short-term maturity of these instruments.
- Since the Company has classified marketable securities as "*Available for Sale*", the Company has valued these at the closing price of the shares on the related market where the specific shares are listed for trading at June 30, 2010. As at June 30, 2010, the cost exceeded the fair value of these assets by \$500.

3. FINANCIAL INSTRUMENTS (CONT'D)

Risks

Credit risk

Credit risk refers to the risk that another entity will default on its contractual obligations resulting in financial loss to the Company. The Company's credit risk is primarily attributable to its cash deposits and GST recoverable. Cash is held with a reputable Canadian institution and GST recoverable is due from the government of Canada. Management believes the risk of loss to be minimal.

Market risk

Market risk includes currency risk, interest rate risk and price risk. The Company's activities expose it primarily to the financial risks of changes in the price of commodities. The exposure includes the ability to raise capital with favourable terms and the value of the marketable securities the Company accepts for certain option rights on its properties. The Company holds all cash in an interest bearing account and has no other interest bearing financial assets or liabilities, except for loans which have a fixed interest rate. The Company does not currently hold any financial instruments that mitigate this risk.

Liquidity risk

Liquidity risk refers to the risk that the Company will not be able to meet its financial obligations when they become due, or can only do so at an excessive cost. Accounts payable and accrued liabilities are current. The Company's loans payable were paid in full by the Company during the year ended March 31, 2010 (see "Related Party Transactions and Commitments" (Note 10) and "Loans Payable" (Note 11)).

7. SHARE CAPITAL (CONT'D)

i. Share consolidation

Effective August 13, 2009 all of the issued common shares of the Company were consolidated on the basis of 10 pre-consolidation common shares for 1 post-consolidation common share. The weighted average number of shares outstanding at June 30, 2009 has been retroactively adjusted and is determined as though the consolidation occurred at March 31, 2009.

ii. Private placement

In December 2009, the Company closed the first tranche of a non-brokered private placement of 5,751,664 units of the Company for gross proceeds of \$345,100. Each unit is comprised of one common share and one transferable share purchase warrant. Each share purchase warrant entitles the holder to purchase one additional common share of the Company at \$0.10 per share until December 15, 2011. The issued securities were subject to a hold period until April 16, 2010. No finder's fees were paid.

In January 2010, the Company closed the second and final tranche of the non-brokered private placement of 720,000 units of the Company for gross proceeds of \$43,200. Each unit is comprised of one common share and one transferable share purchase warrant. Each share purchase warrant entitles the holder to purchase one additional common share of the Company at \$0.10 per share until January 7, 2012. The issued securities were subject to a holder period until May 8, 2010. No finder's fees were paid.

Stock Options

The Company has adopted an incentive stock option plan (the "Plan"). The Plan provides that the aggregate number of shares of the Company's capital stock issuable pursuant to options granted under the Plan may not exceed 1,182,741 (post-consolidation). Options granted under the Plan may have a maximum term of ten (10) years. The exercise price of options granted under the Plan will not be less than the greater of (i) the last closing market price of the Company's shares on the last day shares are traded prior to the grant date; and (ii) the grant date. Stock options granted under the Plan vest immediately subject to vesting terms which may be imposed at the discretion of the Directors, however, options issued to investor relations persons must vest in stages over 12 months with no more than one-quarter of the options vesting in any 3 month period.

A summary of the status of the Company's outstanding stock options as at June 30, 2010 and March 31, 2010 and changes during the periods then ended are as follows:

i) Stock-based compensation

During the current period, stock-based compensation has been recorded in the amount of \$Nil (June 30, 2009 - \$Nil) and included in contributed surplus. The amount is management's estimate of the fair value of the stock options granted and vested in the period, and has been expensed in the statement of operations as consulting services. The stock-based compensation value was determined using the Black-Scholes option pricing model. The fair value computed using the Black-Scholes model is only an estimate of the potential value of the individual options and the Company is not required to make payments for such transactions. Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options.

9. CAPITAL MANAGEMENT

The Company manages its capital to ensure it will be able to continue as a going concern and continue the acquisition, exploration and development of its resource properties. The Company has no operations that generate cash flow and depends on equity sales to finance its exploration programs and administrative expenses. These stock issues depend on numerous factors including a positive mineral exploration environment, positive stock market conditions, a company's track record, and the experience of management. The capital structure of the Company consists of shareholder's equity, comprising issued capital and retained earnings (deficit). The Company is not exposed to any externally imposed capital requirements.
